Is 2009 going to be the year that you finally lose those unwanted pounds? The experts at Medical Weight Loss Clinic want to show you how! They've been helping Michigan residents lose weight and keep it off for 23 years. The company has 32 clinics in Michigan offering weight loss programs for women, men and teens.

The first Medical Weight Loss Clinic opened its door in 1986. Today they have grown to 34 locations across Michigan and in northern Ohio. They have helped tens of thousands of people gain control of their weight and their lives. This year alone, Medical Weight Loss Clinic patients will lose over 2 million pounds!

The programs at Medical Weight Loss Clinic focus on helping patients develop healthy eating habits. All of their plans use regular grocery store foods, and feature unlimited visits to the clinic for nutritional guidance and individual support. Patients keep their weight off permanently with Medical Weight Loss Clinic's Lifetime Maintenance program.

At Medical Weight Loss Clinic your program is designed based on your individual medical profile.

During your first visit to the clinic, the staff will perform a medical evaluation and develop the program that is right for you. They will explain all the details of the program and answer all of your questions. This personal consultation will provide all the information you need to make your decision.

"We offer a variety of weight loss options, which allows us to design a program that meets a patient's specific needs," says Alberta Lipinski, LPN. Alberta, who has been a nursing supervisor with Medical Weight Loss since 1986, says that the medical supervision sets their program apart from other weight loss providers. "Most people who come to our clinics have tried to lose weight on their own or with other weight loss programs. They are looking for a permanent solution for their weight and are ready to make that commitment, and our staff is there to guide them all the way."

Medical Weight Loss Clinic offers programs designed to make dieting easier for those who have struggled to lose their weight. The Jump Start program offers a solution for the busy dieter who struggles to make healthy choices in today's fast paced lifestyle.

The prescription therapy program is designed to help patients who need help with appetite control.

Debbie Standish of Port Huron won a 30-pound weight loss program when a friend entered her name into a drawing at the Medical Weight Loss Clinic booth at an expo. Debbie was reluctant to start the program because she wasn't sure she was ready to make the lifestyle changes needed to lose her weight. She decided to go ahead with the 10-week program, and was quickly amazed how easily the weight started coming off! "That's when I started getting excited," says Debbie.

Two years later, Debbie is maintaining her 130-pound weight loss! She never felt hungry on her program, but admits there were some very difficult times. "Being able to talk with the staff in the clinic helped me through those times, because they understood what I was going through."

At Medical Weight Loss Clinics, patients lose weight without fad diets or dangerous surgeries. Call the clinic nearest you at 1-800-GET-SLIM today and find out how they can be the last weight loss program you will ever need.
